

# EPP API Basics

The EPP API maps the RFC EPP standard. All basic information about the EPP API are summarized on this page.

## Table of contents

- 1 [Gateway Addresses](#)
- 2 [Connecting to the EPP System](#)
- 3 [Session](#)

## Gateway Addresses

- **Live system:** epp.domain-robot.org:700
- **Demo system:** epp-demo.domain-robot.org:700

## Connecting to the EPP System

We only allow 3 simultaneous connections per IP. All other connections from the same IP will be rejected by the system.

## Session

We recommend to keep the current session (EPP stream) active. Don't send a login command before each command.
