

Domain Robot EPP API

The EPP API documentation contains all the information needed to connect to the system and use the EPP API.

[API Guides](#)

The guides serve as a "best practice" foundation for procedures within the system.

We highly recommend starting with the article [Activating, updating or revoking Access to the EPP API](#). In addition, we advise you to read the [EPP API Basics](#) article for information about connecting to the system.

[API Reference](#)

The [reference articles](#) contain information about the object structure of the API. The syntax of different EPP commands are shown using XML examples.
