Domain Robot JSON API

This documentation of the Domain Robot JSON API contains all information for the integration and use of the JSON API.

JSON API Basics

The JSON API Basics page provides a brief overview of the JSON API. We recommend that you start with this page.

Technical Documentation

The technical documentation provides an overview of routes and API objects. The documentation is in OpenAPI 2.0 format.

Process Descriptions

In the API Processes section, all important domain and certificate processes are documented in step-by-step instructions to help you implement the Domain Robot API. Each of them describes how a process can be automated and includes corresponding XML and JSON examples.
